Dear inhabitant of Jette,
Back to blue basics !

Our fine commune in the northwest of Brussels has a lot of potential, but with MR-VLD we want to go back to basics.

A clean commune, a safe commune, that is well managed, financially as well.

A commune where local trade flourishes with a wide and high-quality range. A commune where people are able to move freely. Regardless if they are pedestrians, cyclists or motorists. And with good public transport.

The municipality can do a great number of things for its citizens, but with MR-VLD we want to go back to these core tasks. All the better to render service to the people of Jette.

Sven Gatz, leading candidate

SAFETY

SANITATION

We can do better.

Is Jette clean? No, insufficiently so.

We feel and think we can and should do better in this regard.

- More waste bins in public spaces
- Also more camera surveillance and quicker interventions by the sanitation department and the police
- The polluter pays, tit for tat
- More awareness education in all schools in Jette
- Reinforcing security, in the field and through the revalorisation of the neighbourhood police officer
- Reinforcing the e-police in terms of accessibility

MOBILITY

Freedom for all

Let's go for a commune where everyone can move, as smoothly and safely as possible.

- Ensure better mobility within the municipality: the Jetten resident has priority
- Make better and round the clock use of existing parking spaces, e.g. those of supermarkets
- Make the parking policy more friendly for guests and visitors
- Focus on a few larger bicycle parking areas
- Differentiated parking rates depending on the function of the neighbourhood, e.g. catering and trade
- More electric charging stations in cooperation with public and private operators

Better citizen participation
=
greater support!

COMMERCE

For a thriving commerce

Commercial activities in Jette are there for the people of Jette, but all Brussels residents from the north-west and beyond are more than welcome!

- Increase support for start-ups, as the first few months of a business are the most complicated.
- We create a quality label for the local commerce
- A real partnership between the municipality and local businesses: attractiveness and parking
- New zonal regulations: promotion of local commerce
- The alderperson for commerce as central manager
